## SUMMARY

Enthusiastic beginner React.js developer proficient in TypeScript and with a foundational understanding of the MERN stack. Eager to learn and contribute in a collaborative environment. Learning resources include GeeksforGeeks and freeCodeCamp.

## EXPERIENCE

### Web Dev Intern

Gao Tek

November 2024 - Present

- **Utilized WooCommerce Plugins:** Leveraged plugins to enhance the eCommerce platform, improving user interface and user experience.
- **Optimized Database Queries:** Improved MySQL query performance, reducing load times and increasing data retrieval efficiency.
- **Implemented Responsive Design:** Ensured the website was fully responsive, optimizing it for various devices to enhance accessibility and engagement.

## PROJECTS

### QR Code Generator

[qr-easy.vercel.app/](https://qr-easy.vercel.app/)

- Developed QReasy: A simple and efficient QR code generator built with TypeScript, React, react-qr-code, Aceternity UI, and Tailwind CSS.
- Customizable QR Codes: Enabled users to generate QR codes tailored to their specific needs, including adjusting colors, sizes, and embedded data.
- Crafted efficient QR code algorithms, significantly reducing processing time and enhancing performance.

### Spread Sheet

[priyanshu-solon.github.io/spreadSheet/](https://priyanshu-solon.github.io/spreadSheet/)

Created a minimalist online spreadsheet using HTML, CSS, and JavaScript, hosting the project on GitHub for widespread accessibility. A simple web-based spreadsheet for organizing and manipulating data.

### Stats Calculator

[priyanshu-solon.github.io/statCalculator/](https://priyanshu-solon.github.io/statCalculator/)

Built a web-based calculator enabling efficient statistical computations such as mean, median, mode, range, variance, and standard deviation using JavaScript and HTML. Offered a user-friendly interface for statistical calculations with clear result displays and options for different data input methods.

### Calorie Counter

[priyanshu-solon.github.io/Calorie-Counter/](https://priyanshu-solon.github.io/Calorie-Counter/)

- Designed a calorie tracking application that allows users to log their food intake, calculate daily calorie consumption, and set personalized goals.
- Project source code is hosted on GitHub, allowing for collaboration and open-source contributions.

## EDUCATION

### Bachelor of Technology - Computer Science & Engineering

Loknayak Jai Prakash Institute of Technology • Chapra, Bihar • 2023 • 7.86 CGPA

## COURSEWORK

### Responsive Web Design

FreeCodeCamp • 2024 • HTML, CSS, JS

### Javascript-Algorithms-And-Data-Structures

FreeCodeCamp • 2024 • Javascript, Algorithms and Data Structures

### Postman API Fundamentals Student Expert

Postman • 2024 • APIs

### CCNA: Introduction to Networks

Cisco • 2019 • Networks

## SKILLS

HTML, CSS, JavaScript, MongoDB, ExpressJS, ReactJS, NodeJS, JSON, jQuery, Apache Server, PHP, MySQL, GitHub

Languages: English, Hindi
